

THE EUExc@RT PROJECT

EUExc@rt Receives Top Score

"The Pilot Project EUExc@rt has been so successful that it should become a model for other pilot projects."

The Swedish Programme Office's evaluation of the project is filled with admiration. EUExc@rt gets nine out of ten points for the prosperous work.

The Programme Office establishes the fact that the pilot project has fulfilled its commitments. The project has reached even further than that. It is characterized by its innovative work.

"EUExc@rt's most important task was to establish an international network to strengthen the European explosives sector. That has been fulfilled. Within the project different products have been produced like educational programmes, CD-ROMs, newsletters, website, power points etcetera. As far as the Programme Office can assess they are of good quality."

The work developing European framework EExQF for the explosives sector and common educational models is also very important, due to the Swedish Programme Office.

become a model
for other pilot
projects"*

Time to Register for the World Conference

The preliminary programme for the world conference can now be found at www.euexc@rt.org.

The symposium at Cranfield University, UK in June 13-15 will examine the development of a range of explosive competencies and qualifications in research, design and development, safety management, test and evaluation, manufacture, maintenance, procurement, storage, transport, and disposal. Current and future requirements will be presented together with flexible training approaches to meet these needs. In addition, the setting up of a Foundation will be discussed with a view to awarding a European Explosives Certificate.
